- Adaptability
- Attention to Detail
- Communication
- Collaboration
- Problem-Solving
- Teamwork

# SREEHARI S

Self-taught developer proficient in Python, HTML, CSS, Django, and foundational React knowledge. Immersed in new areas, I took advantage of self-taught lessons and gained valuable skills in backward and forward development. I bring a passion for problem solving and transformation to drive results in web development.

# Experience

**SQL Developer**
TL Technologies
April 2023-Present

- As a SQL Developer, I designed ER diagrams, developed efficient table schemas, and optimized stored procedures. I also skillfully hosted Node.js, .NET, and React applications using IIS, ensuring seamless integration between front-end and back-end systems.
  - Achievements
    - Our team completed a major project-US Client's Website, Admin Panel(CRM, CMS), and Appointment Management System.
    - Led key aspects of database design and contributed significantly to the development of tables and stored procedures.

# Projects

**TL Technologies**

EveryHome-Mobile Application

- Led the development of database tables and stored procedures within a 3-member team, ensuring alignment of architecture with front-end and back-end requirements
- Designed an Entity-Relationship diagram to improve schema optimization and make complex data relationships clear.
- Played a vital role in enhancing communication between teams and making data management more efficient.

Kerala Drives-Tourism Website

- Contributed to the project by actively engaging in front-end development using HTML, CSS, and Bootstrap.
- Crafted multiple functional web pages, ensuring a seamless user experience.
- Managed deployment to the production environment, making the website live and accessible to users.

Ecommerce Website And CPanel

- Contributed significantly to the project through active participation in React-based front-end development.
- Designed an Entity-Relationship diagram to enhance schema optimization and clarify intricate data relationships.
- Played a pivotal role in facilitating communication between teams and enhancing data management efficiency.

**BROTOTYPE**

Data Visualization and Analysis

- Engaged in a project focused on analyzing Fandango's movie ratings in 2015 to evaluate potential bias toward inflating ratings for increased ticket sales.
- Employed pandas and advanced visualization techniques to draw informed conclusions, showcasing proficient data analysis skills.

Greatkart- Ecommerce website

- Employed Django framework for backend development, SQLite for database management, and HTML/CSS for frontend design.
- Took charge of the development and upkeep of database schemas, meticulously ensuring data accuracy and upholding integrity standards.
